

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

- 1) If the parking brake will not hold on a hill or requires excessive lever movement always check and adjust the _____ before adjusting the parking brake cable. 1) _____
A) Front brake pads B) Wheel bearings
C) Brake fluid level D) Rear brake adjustment

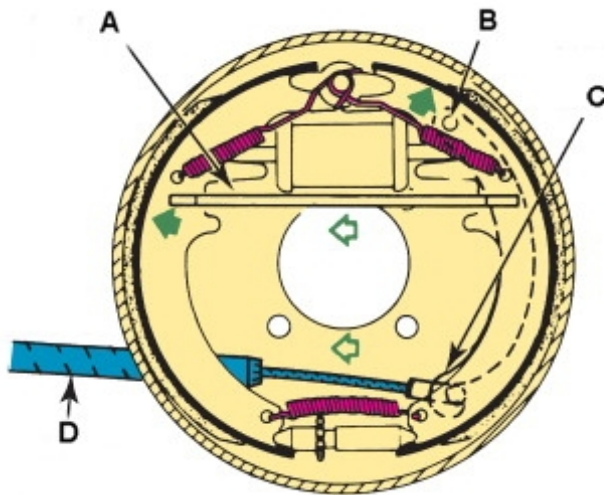

- 2) On most drum brake systems, the parking brake lever and strut transfer the pulling force of the parking brake cable against the _____. 2) _____
A) Secondary shoe B) Primary shoe

- 3) Technician A says the parking brake cable adjustment should be performed before adjusting the rear brakes. Technician B says the parking brake cable should allow for about 15 "clicks" before the parking brake holds. Which technician is correct? 3) _____
A) Technician A only B) Technician B only
C) Both technicians D) Neither technician

- 4) A vehicle is equipped with rear disc brakes. What type of parking brake could it have? 4) _____
A) Brake shoes inside the rotor hat B) An actuator assembly inside the caliper
C) Either A or B D) Both A and B

- 5) The parking brake cable can be adjusted in most cases at the _____. 5) _____
A) Link B) Star wheel adjusters
C) Equalizer D) Operating lever

- 6) Which of these components is the parking brake strut? 6) _____

- A) A
- B) B
- C) C
- D) D

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

- 7) The parking brake warning light is independent of all other systems. 7) _____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

- 8) Technician A says that the parking brake cable should be adjusted at each wheel. Technician B says that the parking brake cable adjustment is usually done after adjusting the rear brakes. Which technician is correct? 8) _____
- A) Technician A only
B) Technician B only
C) Both technicians
D) Neither technician

- 9) Most auxiliary drum parking brakes are adjusted by _____. 9) _____
- A) Turning a wingnut
B) Adjusting the parking brake cables
C) Turning a starwheel
D) Adjusting the service brakes

- 10) Technician A says that an electric parking brake (EPB) uses an electric motor to pull on the parking brake cable. Technician B says that some electric parking brake systems use a computer controlled motor attached to the caliper. Which technician is correct? 10) _____
- A) Technician A only
B) Technician B only
C) Both technicians
D) Neither technician
