Exam

Name_____

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

1) Bleeding is complete when a stream of fluid free of air bubbles flows from the bleeder screw. 1) _____

2) Discharge the power brake booster before manually bleeding the brakes. 2) _____

3) Pressure bleeders are charged to approximately 300 psi (2069 kPa). 3) _____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

4) Technician A says a bleeder screw wrench is needed to manually bleed brakes. Technician B says a length of plastic hose and clear jar should be used when manually bleeding brakes. Which technician is correct? 4) _____

A) Technician A only B) Technician B only
C) Both technicians D) Neither technician

5) Technician A says the wheel brake farthest from the master cylinder is generally bled first. Technician B says the wheel brake closest to the master cylinder is generally bled first. Which technician is correct? 5) _____

A) Technician A only B) Technician B only
C) Both technicians D) Neither technician

6) The bleeder is opened at a caliper and no brake fluid flows out. Technician A says that this is normal and that brake fluid should not flow or drip out of an open bleeder valve. Technician B says that the vent port in the master cylinder may be blocked. Which technician is correct? 6) _____

A) Technician A only B) Technician B only
C) Both technicians D) Neither technician

7) The usual maximum pressure that should be used when pressure bleeding a brake system is _____. 7) _____

A) 50 psi B) 70 psi C) 30 psi D) 20 psi

8) Brake fluid flushing includes all of these EXCEPT _____. 8) _____

A) Adding new brake fluid B) Bleeding at all four wheels
C) Removing the old brake fluid D) Changing brake fluid filter

TRUE/FALSE. Write 'T' if the statement is true and 'F' if the statement is false.

9) When manually bleeding the wheel brakes, press the brake pedal rapidly to the floor. 9) _____

MULTIPLE CHOICE. Choose the one alternative that best completes the statement or answers the question.

10) Two technicians are discussing bench bleeding a master cylinder. Technician A says that the front (nose end) of the master cylinder should be bled first. Technician B says that rear (brake pedal end) should be bled first. Which technician is correct? 10) _____

A) Technician A only B) Technician B only
C) Both technicians D) Neither technician
